GETTING THE MOST OUT OF THE INTERACTIVE DEVELOPMENT MAP

This document contains a few quick pointers to get you started on navigating and getting to know all of the useful capabilities our interactive map features such as:

Plot Specific Details

Plot Comparison

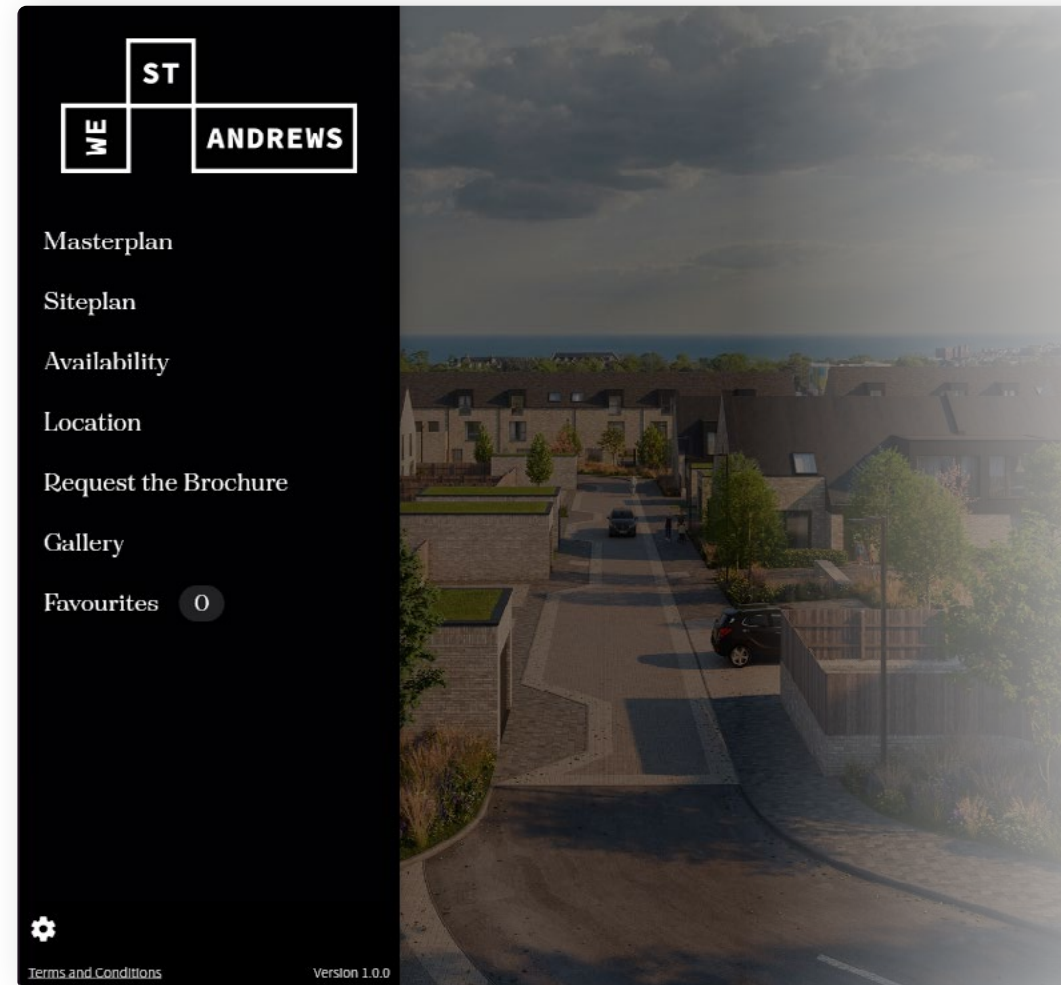

Availability Indicators

Immersive Viewpoints

01. Main Menu

Navigate this tool using the main menu in the top left corner. From here you can access all the tool has to offer; select between site plans, house types, the local area map, galleries and even favourite any plot you like for later reference.

02. Plot Details & Comparisons

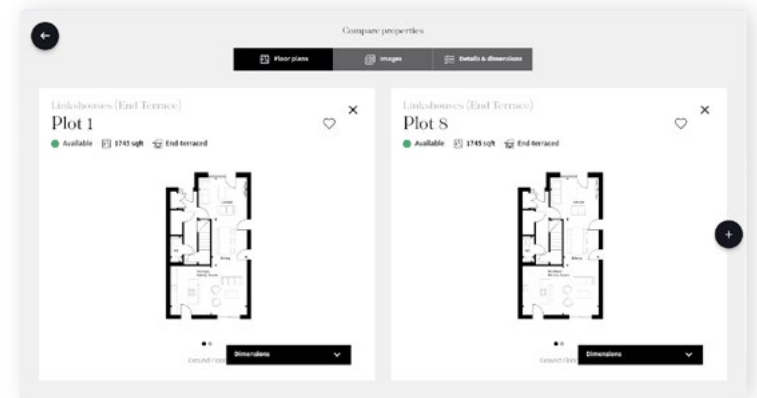

To find out more about a plot simply click on it, and for even more detail select **'View style'** – from here you can see everything about the plot you have selected and even compare it to others using the compare button in the bottom left corner next to the share and favourite buttons. You can return to the previous view using the back button in the top left corner.

Compare Button

Comparison View

03. Plot Colour Coding

Please note that each colour reflects the plot's availability:

- | AVAILABLE
- | RESERVED
- | SOLD
- | UNRELEASED

04. Step inside the development

For a more immersive experience, click the person icon in the bottom left corner.

This activates a series of viewpoints across the development, shown as small blue circles. Each one represents a real position within the site.

Simply click on any of these points to:

- See an indicative view of your surroundings
- Get a sense of layout, spacing, and outlook

This feature is designed to help you go beyond the plan - giving you an understanding of how the development will look and feel once complete.
